Dyna Clean FC WB

Dyna Clean FC WB is a special cleaning agent designed for cleaning the rubber surfaces of rollers and sleeves, which should be cleaned of UV / LED varnishes - cured. It is a modern water-based agent that cleans quickly and efficiently without affecting the NBR / EPDM rubber surfaces to be washed.

Characteristic:

- Highly efficient
- Environmentally friendly product
- VOC 1.5% (EC regulation 2004/42 / EC)
- Less harmful
- Strong reduction of solvent fumes
- Excellent cleaning properties
- Ready and easy to use

Use:

Gloves are recommended. Apply Dyna Clean FC WB undiluted with a cloth or sponge to the surface that needs cleaning. If necessary, allow the agent to penetrate the surface and remove deposits. Then clean again with Dyna Clean FC WB with a dampened cloth.

Packaging:

Barrels / containers 20L, 200L and 1000L

The agent is compatible with blends from groups

NBR and EPDM
